Citizens and Scientists for Environmental Solutions

Highlights

- **Industry trends program**
- **SDP**
- **Selectively risk-informed**
- **Commissioner's forecast**

Union of
Concerned
Scientists

Citizens and Scientists for Environmental Solutions

Industry Trends Program

- **Recommended additions:**

- **Trend causes for NRC SITs, AITS, and IITs conducted each year to flag emerging issues**

- Trend safety during outages**

Union of
Concerned
Scientists

Citizens and Scientists for Environmental Solutions

SDP

- **Recommended fix:**
 - **Impose a 90-day hard deadline for final SDP color assignments**

Union of
Concerned
Scientists

Citizens and Scientists for Environmental Solutions

Selectively Risk-Informed

- **Recommended fix:**
 - **Include design errors in fault exposure time calculations for PIs**

Union of
Concerned
Scientists

Citizens and Scientists for Environmental Solutions

Commissioner's Forecast

- **Recommended fix:**
 - **Revise NRC procedure for investigating near-misses to require formal evaluation against ROP**

Union of
Concerned
Scientists

Citizens and Scientists for Environmental Solutions

Wrap-up

**UCS continues to believe
that ROP is superior to SALP**

**UCS cannot point to a single
shred of evidence to
corroborate our belief**

What is driving safety trends?
