

Dam Safety

Joint FERC/NRC Meeting

Brian Smith, Deputy Director
Division of Engineering
Office of Nuclear Reactor Regulation
May 28, 2014

Dam Safety Ensured through Inspections

- **Inspection finding:**
 - **Crack in embankment of Smith Ranch Dam**
- **Corrective actions implemented by licensee**
- **Effectiveness of Dam Safety Inspections**

Effective Interactions Regarding Flooding Reevaluations

- **Flooding reevaluations require input from upstream dam owners/regulators**
- **NRC interacting with federal partners to facilitate licensee's flooding reevaluations.**
