

# International Brotherhood of Electrical Workers (IBEW)

**Anna Jerry**  
**IBEW Utility Department**

# WHO WE REPRESENT:

- **83% of all the organized utilities in the United States and Canada**
- **70% of the organized investor-owned utilities**
- **96% percent of the organized rural electric cooperative utilities**
- **76% of the organized municipal utilities**
- **100% of all organized federal government utilities**

**INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS**

## **WE HAVE TWO ISSUES:**

- **The first issue is immediate: Markets with Grid Stability**
- **Ironically, we are talking about reducing CO-2 while also closing Nuclear plants!**

**INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS**

# THE MARKETS ARE KILLING US!

- Nuclear power plants are unique—and uniquely valuable—among carbon-free sources of electricity.
- Policymakers and regulators must enact rules that place clear, unambiguous value on all baseload generation that meets our 24/7 demand for power.
- Americans need reliable electricity, and they want clean air. They can have both with nuclear energy.

INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS

**The second issue:  
NRC funding activities should  
not allocate any resources to  
“Access Rulemaking.”**

**INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS**

**The goal of the IBEW is to provide the highest quality work, in the safest manner possible, to every job every time.**

**INTERNATIONAL BROTHERHOOD OF ELECTRICAL WORKERS**
