

February 12, 1999

MEMORANDUM William D. Travers
TO: Executive Director for Operations
FROM: Annette Vietti-Cook, Secretary /s/ Ken Hart for
SUBJECT: STAFF REQUIREMENTS - SECY-98-253 - APPLICABILITY OF PLANT-SPECIFIC BACKFIT
REQUIREMENTS TO PLANTS UNDERGOING DECOMMISSIONING

The Commission has approved the development of a backfit rule (or modification to 10 CFR 50.109, as appropriate) specific to plants undergoing decommissioning consistent with other competing priorities. The effort should not displace any high priority rulemaking activities. The rule should be reasonably straightforward and not resource intensive to draft and should not require the use of a series of workshops. In the interim, the staff should continue to apply the current backfit rule to plants undergoing decommissioning.

The rulemaking plan should be forwarded to the Commission for information.
