

July 21, 2014

The Honorable Fred Upton  
Chairman, Committee on Energy  
and Commerce  
United States House of Representatives  
Washington, DC 20515

Dear Mr. Chairman:

On behalf of the Commission,<sup>1</sup> I am transmitting the June 2014 monthly status report on the U.S. Nuclear Regulatory Commission (NRC) activities and utilization of unobligated carryover funds appropriated from the Nuclear Waste Fund. This report describes the NRC actions that were taken in June 2014 to address the remand by the U.S. Court of Appeals for the District of Columbia Circuit in *In re Aiken County*, regarding the licensing process for the U.S. Department of Energy's Yucca Mountain license application.

Please feel free to contact me or Amy Powell, Acting Director of the Office of Congressional Affairs, at (301) 415-1776 if you have questions or need more information.

Sincerely,

**/RA/**

Allison M. Macfarlane

Enclosure:  
[As stated](#)

cc: Representative Henry A. Waxman

---

<sup>1</sup> Commissioner George Apostolakis did not participate; his term on the Commission ended June 30, 2014.

**Identical letter sent to:**

The Honorable Fred Upton  
Chairman, Committee on Energy  
and Commerce  
United States House of Representatives  
Washington, DC 20515  
cc: Representative Henry A. Waxman

The Honorable John Shimkus  
Chairman, Subcommittee on Environment  
and the Economy  
Committee on Energy and Commerce  
United States House of Representatives  
Washington, DC 20515  
cc: Representative Paul Tonko

The Honorable Barbara Boxer  
Chairman, Committee on Environment  
and Public Works  
United States Senate  
Washington, DC 20510  
cc: Senator David Vitter

The Honorable Sheldon Whitehouse  
Chairman, Subcommittee on Clean Air  
and Nuclear Safety  
Committee on Environment  
and Public Works  
United States Senate

cc: Senator Lamar Alexander

**U.S. Nuclear Regulatory Commission Monthly Status Report  
Activities Related to the Yucca Mountain Licensing Action  
Report for June 2014**

**Background**

On August 13, 2013, a panel of the U.S. Court of Appeals for the District of Columbia Circuit issued its decision in the case *In re Aiken County* directing the U.S. Nuclear Regulatory Commission (NRC) to “promptly continue with the legally mandated licensing process” for the U.S. Department of Energy’s (DOE’s) application to construct a geologic repository for high-level waste at Yucca Mountain, NV. The NRC promptly began taking steps to comply with the court’s direction following the issuance of the decision. On November 18, 2013, the Commission approved a Memorandum and Order, which set a course of action for the Yucca Mountain licensing process that is consistent with the Appeals Court decision and with the resources available. The Commission also issued a related Staff Requirements Memorandum on November 18, 2013. The Commission provides further direction to the staff as needed.

**Accomplishments and Ongoing Work**

The NRC staff in the Office of Nuclear Material Safety and Safeguards, with the support of the Center for Nuclear Waste Regulatory Analyses, continues to make significant progress toward completing the four remaining volumes of the safety evaluation report (SER). Attached is the task tracking tool, “Status of Safety Evaluation Report (SER) Chapters and Volume Tasks,” which documents work completed through June 30, 2014. The majority of chapter milestones have been completed on time or ahead of due dates; any chapter that does not meet the projected schedule receives further management attention. Management and staff are actively working to resolve delays in those chapters that have not met their due dates. Although several chapters are currently behind schedule, the final volume end dates have not changed. Completion of the SER remains the staff’s highest priority for this project and is on track for completion by January 2015.

Agency attorneys provided support to the staff and the Commission on project activities and participated in ongoing Federal court litigation related to Yucca Mountain. Agency attorneys also advised the staff on issues related to SER development and continued reviewing draft chapters of the SER.

**Schedule and Cost for Remaining Activities**

Completion of the SER is scheduled to take approximately 12 months, ending in January 2015. To date, no unforeseen technical or process issues have arisen that would affect the completion date. SER activities are proceeding within the September 2013 budget estimate of \$8.3 million.

The schedule for completion of an environmental impact statement (EIS) supplement is currently being considered. On February 28, 2014, DOE informed the NRC that it would not complete an EIS supplement that the staff has determined is needed for the review of DOE’s application under the National Environmental Policy Act, but rather would provide an update to a 2009 technical report that would inform an EIS supplement. On April 7, 2014, NRC staff met with DOE staff in a public meeting to discuss DOE’s revision of this report, entitled, *Analysis of Postclosure Groundwater Impacts for a Geologic Repository for the Disposal of Spent Nuclear Fuel and High-Level Radioactive Waste at Yucca Mountain, Nye County, Nevada*. NRC is awaiting receipt of the update to the 2009 technical report.

Enclosure

After DOE informed the NRC that it would not complete an EIS supplement, the Commission necessarily revised its earlier direction to adopt DOE's supplement. The Commission has directed the staff to plan to develop and issue an EIS supplement. The work on the EIS supplement would not begin until at least the fall of 2014, when work on the SER is substantively complete and appropriate personnel are available to support the EIS supplement effort. At that time, staff will submit to the Commission its assessment of remaining Nuclear Waste Fund (NWF) funds and its proposed plan to complete the EIS supplement. The Commission will then provide direction on the allocation of funding to this task based on the staff's updated assessment. The previous cost estimate of \$625,000 for an adoption determination of a DOE-developed EIS supplement would be revised to account for an NRC-developed EIS supplement as part of the fall 2014 reassessment.

The Licensing Support Network (LSN) document collection is fully available to internal users in a nonpublic library of the NRC's Agencywide Documents Access and Management System (ADAMS). This project was completed in April 2014 at an estimated cost of \$350,000. The Commission has also directed that, pending available funding, the LSN document collection should be loaded into a publicly accessible library in ADAMS when work on the SER is substantively complete and available funding from the NWF can be reassessed. This activity would not begin until at least the fall of 2014.

The staff's February 2014 estimate that related activities, such as the work performed by NRC attorneys on Federal court litigation following the issuance of the mandamus order, monthly reporting, and other support efforts, will require approximately \$750,000 over the course of the project has not changed.<sup>1</sup>

The total cost estimate for the work described above as of June 30, 2014, is projected to be approximately \$10 million.

---

<sup>1</sup> This total does not include any potential agency liabilities from external litigation.

## Nuclear Waste Fund Expenditures

During the month of June, the NRC expended \$799,737 of NWF funds on its actions in direct response to the court's decision. Cumulative expenditures since the August 13, 2013, U.S. Court of Appeals decision are \$4,999,634. The August 13, 2013, balance of \$13,549,315 of unexpended NWF funding, less the \$4,999,634, results in a remaining unexpended balance of \$8,549,681. Total unobligated NWF funds remaining as of June 30, 2014, are \$6,934,447. The following table provides further details regarding the NRC's expenditure of NWF funds since August 13, 2013.

<b>Yucca Mountain Licensing Activities</b>	<b>Cost Estimate</b>	<b>June Expenditures</b>	<b>Cumulative Expenditures</b>
Completion of the safety evaluation report	\$8,310,000	\$788,602	\$4,052,736
Loading of Licensing Support Network documents into a nonpublic ADAMS library	\$350,000	\$0	\$272,240
Development of the environmental impact statement supplement*	\$625,000	\$0	\$47,427
Program planning and support		\$9,213	\$267,180
Response to the August 30, 2013, Commission Order		\$0	\$137,518
Federal court litigation**		\$1,922	\$148,056
Support/Advice in NRC proceedings		\$0	\$35,535
Subtotal, other support costs chargeable to NWF funds	\$750,000	\$11,135	\$588,289
Adjustments to close out contracts funded by previous NWF appropriations		\$0	\$38,942
<b>Total</b>	<b>\$10,035,000</b>	<b>\$799,737</b>	<b>\$4,999,634</b>

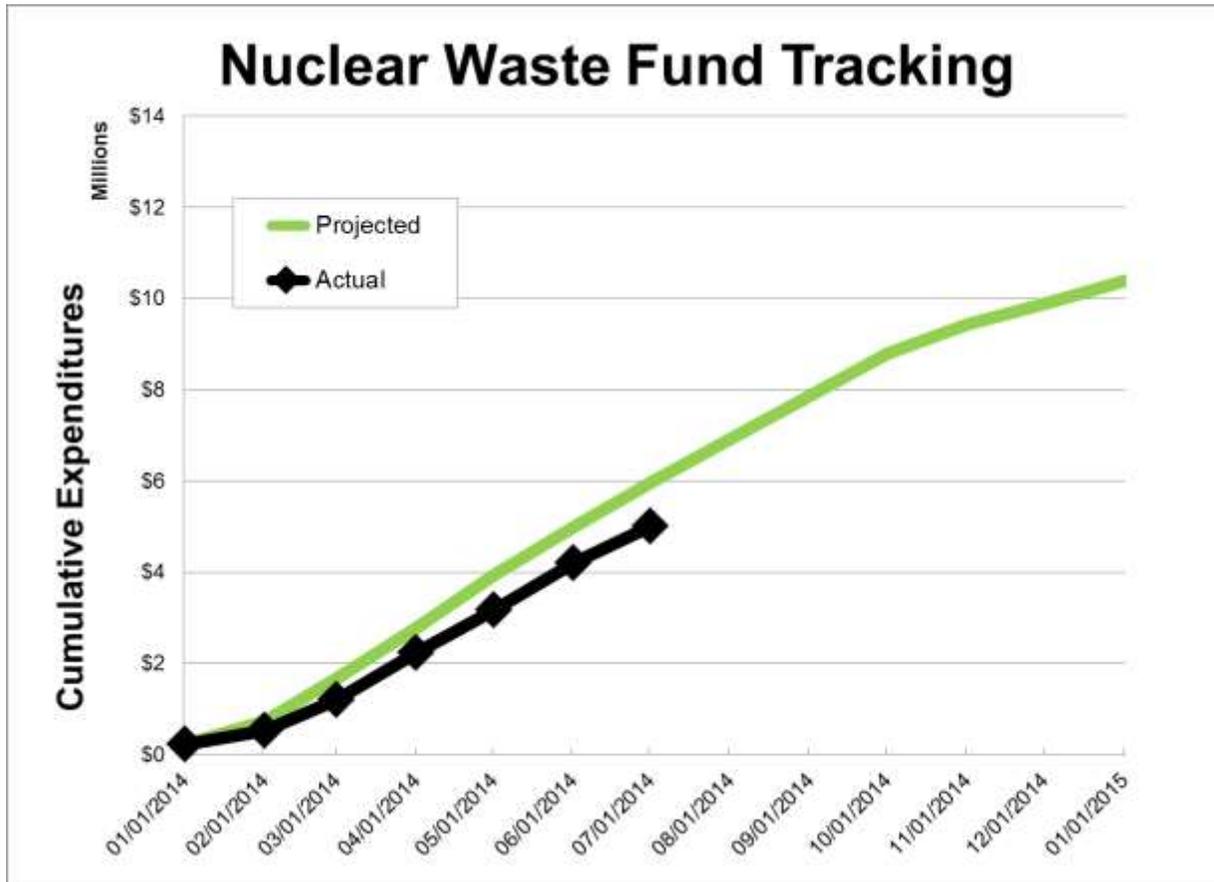

\* The estimate of \$625,000 for an adoption determination of a DOE-developed EIS supplement would be revised to account for an NRC-developed EIS supplement as part of the fall 2014 reassessment of remaining NWF funds consistent with Commission direction.

\*\* Includes a \$59,000 expenditure in May for the agency's agreement to settle the Equal Access to Justice Act claim of one of the *Aiken County* petitioners. The agency has sought the views of the Comptroller General as to whether this payment is properly paid with NWF funds.

The unexpended NWF fund balance of \$8,549,681 includes \$254,348 of previously appropriated NWF funds that remain unexpended but obligated on contracts with the Center for Nuclear Waste Regulatory Analyses.

The staff has estimated the expenses necessary to complete the SER and related activities directed by the Commission. Figure 1 on page 4 shows the cumulative projected and actual expenditures. Projected expenditures include cost estimates shown in Table 1. The actual cumulative expenditures reflect costs through June 30, 2014, as given in Table 1.

Figure 1. Nuclear Waste Fund Tracking

### Stakeholder Communications and Interactions

On June 10, 2014, staff presented a status update of the NRC's review of the Yucca Mountain license application at the Fuel Cycle Information Exchange held at NRC headquarters in Rockville, MD.
