

The following Security Advisory (SA) is not available because it is marked "Official Use Only – Security-Related Information/Safeguards Information" and is exempted from public disclosure in accordance with 10 CFR 2.390.

SA-05-04, "NATIONAL SPECIAL SECURITY EVENT FOR THE PRESIDENTIAL STATE OF THE UNION ADDRESS IN THE WASHINGTON, DC, AREA" DATED JANUARY 28, 2005

In 2005, DHS had designated the Presidential State of the Union Address as a National Special Security Event (NSSE). Therefore, the NRC had recommended that selected NRC Research and Test Reactor (RTR) licensees consider implementing certain security measures. In lieu of The State of the Union Address, licensees were asked to review the need for and maintain certain security measures and to avoid receiving or shipping radioactive materials as stated in SA-04-01.

The Nuclear Regulatory Commission (NRC) has issued SA-05-04- to selected power reactors and research and test reactors. Note that the security advisory contains physical security information and is, therefore, being withheld from public disclosure in accordance with 10 CFR 2.390.
