

The following Security Advisory (SA) is not available because it is marked "Official Use Only – Security-Related Information" and is exempted from public disclosure in accordance with 10 CFR 2.390.

SA-05-08, "Capabilities of Special Purpose Detection Equipment for Personnel, Packages and Materials Searches at the Protected Area Access Point(s)" dated October 20, 2005

This Advisory was provided to assist facility managers and security personnel responsible for protecting U.S. Nuclear Regulatory Commission (NRC) licensed facilities and radioactive materials when implementing search requirements for personnel, packages and materials. An incident at an NRC-licensed facility highlighted the need for continued vigilance.

The Nuclear Regulatory Commission (NRC) has issued SA-05-08 to power reactors and category I fuel cycle facilities. Note that the security advisory contains physical security information and is, therefore, being withheld from public disclosure in accordance with 10 CFR 2.390.
