The following Security Advisory (SA) is not available because it is marked "Official Use Only – Security-Related Information" and is exempted from public disclosure in accordance with 10 CFR 2.390.

SA-2011-07, "MULTIPLE VULNERABILITIES DISCOVERED AND EXPLOIT PACKAGES ARE BEING DEVELOPED FOR INDUSTRIAL CONTROL SYSTEMS"

The Nuclear Regulatory Commission (NRC) issued SA-2011-07 dated July 20, 2011, to licensees because of recently identified cyber threats and vulnerabilities that could potentially impact industrial control systems. These cyber threats and vulnerabilities may adversely impact the integrity, confidentiality, and availability of data and software; deny access to systems, services, and data; and adversely impact the operation of systems, networks, and equipment related to safety functions or that are important to safety, security, or emergency preparedness functions. This includes all offsite communications, support systems, and equipment that, if compromised, would adversely impact safety, security, or emergency preparedness functions.
