

Control Rod System Test
Preoperational Test Procedure Review
Procedure No.: 70332B
Issue Date: 1/1/79

SECTION I
INSPECTION OBJECTIVES

1. Ensure that the test procedure is technically adequate.
2. Ensure that the described test is consistent with regulatory requirements, guidance and licensee commitments.

SECTION II
INSPECTION REQUIREMENTS

The inspector shall:

1. Obtain and review an approved copy of the test procedure(s) for technical adequacy prior to the date scheduled for the test.
2. Review the FSAR, docketed correspondence, SER, Technical Specifications, and Regulatory Guide 1.68. Verify that NRC requirements and licensee commitments relating to the Control Rod System are adequately addressed in the test procedure.
3. Review the test procedure(s) in accordance with inspection procedure MC 70300B.

SECTION III

INSPECTION GUIDANCE

1. This review should insure that important system performance functions are adequately reflected in this test procedure. Examples of areas which should be adequately tested in this procedure include (but are not limited to):
 - a. rod drive system,
 - b. rod drop performance,
 - c. rod position indication,
 - d. control rod drive system modes of operation
 - e. rod worth minimizer, and
 - f. control rod system alarms and interlocks.

NOTE: Specific items may be part of other systems tests.
