## NRC Names New Resident Inspector at Callaway Nuclear Power Plant

The Nuclear Regulatory Commission has selected Steve Janicki as its resident inspector at the Callaway nuclear power plant located in Fulton, Mo.

“Steve Janicki has the training and commitment to safety that will help the NRC carry out its mission of protecting people and the environment,” said NRC Region IV Administrator Kriss Kennedy.

Janicki joined the NRC in 2015 as a project engineer in the Division of Reactor Projects in Region IV. He has completed resident inspector rotations at Columbia Generating Station, Fort Calhoun and Comanche Peak nuclear power plants while working on his qualifications as an inspector. He has a bachelor’s degree in mechanical engineering from the University of Arizona and is a veteran of the U.S. Navy where he served aboard the USS Wyoming nuclear submarine.

Each U.S. commercial nuclear power plant has at least two resident inspectors. Janicki will work with Senior Resident Inspector Dan Bradley at Callaway. They conduct inspections, monitor plant operations and significant work projects, and interact with plant employees and the public.
