NRC FY 2009 Budget

NRC mission:

License and regulate the Nation's civilian use of byproduct, source, and special nuclear materials to ensure adequate protection of public health and safety, promote the common defense and security, and protect the environment.

NRC Goals:

- (1) Safety – Ensure protection of public health and safety and the environment.
- (2) Security – Ensure the secure use and management of radioactive materials.

Highlights:

- Proposed budget is \$1.02 billion for FY 2009, an increase of \$90.9 million over the FY 2008 enacted level.
- NRC recovers approximately 90 percent of its budget less an appropriation from the Nuclear Waste Fund and other activities which are not fee recoverable. This results in a net budget authority of \$161.5 million for FY 2009.
- Budget request reflects an increase in agency's regulatory activities, driven primarily by anticipated interest in constructing new nuclear facilities, oversight of existing reactors, and materials and waste licensing.
- Of the \$90.9 million increase requested:
 - \$10.6 million is for regulatory and support activities for new nuclear facilities.
 - \$42.9 million is for regulatory oversight of existing reactors.
 - \$8.3 million is for High-Level Waste
 - \$28.8 million is for other existing materials and waste facilities
 - \$0.3 million is for the Office of the Inspector General
- The NRC has revised its strategic plan to focus on outcomes and the two strategic goals of Safety and Security.
