## NRC Schedules Public Outreach to Discuss Comanche Peak Nuclear Power Plant Performance

**ARLINGTON, Texas**—Nuclear Regulatory Commission staff will conduct an [information session](#) April 14 to discuss the 2025 safety performance of the Comanche Peak Nuclear Power Plant. The plant, which has two units, is in Glen Rose, Texas, and is operated by Vistra Operations Company, LLC.

The information session will be conducted during the Glen Rose City Hall meeting scheduled at 5:30 p.m. at 201 NE Vernon Street in Glen Rose. NRC employees responsible for plant inspections, including the resident inspectors based full-time at the site, will be available to answer questions at the event.

The NRC concluded that the Comanche Peak plant operated safely throughout 2025. All inspection findings and performance indicators were of very low safety significance. As a result, the plant remains under the agency's normal level of oversight, which includes thousands of hours of inspections each year.

The NRC Reactor Oversight Process uses color-coded inspection findings and performance indicators to measure plant performance. The colors start at green and increase to white, yellow, or red based on the safety significance of the issues involved. Inspection findings or performance indicators with more than very low safety significance trigger increased NRC oversight.

The annual assessment [letter](#) for the Comanche Peak plant, including upcoming inspection plans, is available on the NRC website. Current performance information is available on the NRC [website](#) and updated quarterly.

*The U.S. Nuclear Regulatory Commission was created as an expert, technical agency to protect public health, safety, and security, and regulate the civilian use of nuclear materials, including enabling the deployment of nuclear power for the benefit of society. Among other responsibilities, the agency issues licenses, conducts inspections, initiates and enforces regulations, and plans for incident response. The NRC is collaborating with interagency partners to implement reforms outlined in new Executive Orders and the ADVANCE Act to streamline agency activities and enhance efficiency.*
