## NRC to Hold Public Meeting to Discuss Seabrook Station 2025 Safety Performance

**King of Prussia, Pa.**— Nuclear Regulatory Commission staff will conduct a [public meeting](#) May 26 in Seabrook, New Hampshire, to give residents a clear look at how the Seabrook nuclear power plant performed in 2025. The event offers an opportunity for the public to speak one-on-one with NRC inspectors who evaluate the plant throughout the year.

The NRC's annual assessment found that the Seabrook plant operated safely in 2025. All inspection findings and performance indicators were of very low safety significance, so the plant remains under the agency's normal level of oversight, which includes thousands of hours of inspections each year.

The plant, operated by NextEra Energy Seabrook LLC, has one unit, located in Seabrook. NRC resident inspectors who work full-time at the plant, along with other agency staff, will be available during the information session to explain the findings and answer questions. The event begins at 5 p.m. at the Seabrook Public Library, 25 Liberty Lane, in Seabrook.

The agency evaluates [plant performance](#) using a color-coded system that tracks inspection findings and performance indicators. At Seabrook, all inspection findings were green, and all performance indicators were within the expected range.

The [annual assessment letter](#) for the Seabrook plant, including upcoming inspection plans, is available on the NRC website. Current [performance information](#) is also available and updated quarterly.

*The U.S. Nuclear Regulatory Commission was created as an expert, technical agency to protect public health, safety, and security, and regulate the civilian use of nuclear materials, including enabling the deployment of nuclear power for the benefit of society. Among other responsibilities, the agency issues licenses, conducts inspections, initiates and enforces regulations, and plans for incident response. The NRC is collaborating with interagency partners to implement reforms outlined in new Executive Orders and the ADVANCE Act to streamline agency activities and enhance efficiency.*
