NRC Workshop to Discuss Advanced Reactor Materials

Rockville, Md. — Nuclear Regulatory Commission staff will [hold a hybrid meeting](#) June 15 to discuss topics related to developing advanced reactor technology.

What: The all-day workshop will cover structural materials, design codes, materials management and advanced reactor materials licensing.

When: Monday, June 15, 8:30 a.m. to 5 p.m. Eastern time.

How: Participants may attend in person or via [Microsoft Teams](#); the meeting notice includes instructions for in-person attendees.

The U.S. Nuclear Regulatory Commission was created as an expert, technical agency to protect public health, safety, and security, and regulate the civilian use of nuclear materials, including enabling the deployment of nuclear power for the benefit of society. Among other responsibilities, the agency issues licenses, conducts inspections, initiates and enforces regulations, and plans for incident response. The NRC is collaborating with interagency partners to implement reforms outlined in new Executive Orders and the ADVANCE Act to streamline agency activities and enhance efficiency.
