NRC to Hold Public Webinar on New Reactor Licensing Pathways

ROCKVILLE, Md. – The Nuclear Regulatory Commission will hold the first in a series of workshops to support new and advanced reactor designers, developers, and stakeholders in navigating the NRC’s licensing process.

What: License to Launch Workshop #1: Understanding NRC Licensing Frameworks

When: September 30, 12:30-4:30 p.m.

Where: virtually via [Microsoft Teams](#)

Note: More details can be found on the NRC’s [public meeting notice](#).

The U.S. Nuclear Regulatory Commission was created as an expert, technical agency to protect public health, safety, and security, and regulate the civilian use of nuclear materials, including enabling the deployment of nuclear power for the benefit of society. Among other responsibilities, the agency issues licenses, conducts inspections, initiates and enforces regulations, and plans for incident response. The NRC is collaborating with interagency partners to implement reforms outlined in new Executive Orders and the ADVANCE Act to streamline agency activities and enhance efficiency.
