
Issue 27: Manual vs. Automated Actions

DESCRIPTION

This issue was identified during plant design and emergency procedure reviews which raised questions as to whether certain safety actions have to be accomplished automatically or whether manual operator action is acceptable.

CONCLUSION

This issue is covered in Section 2 of this report under Item B-17, "Criteria for Safety Related Operator Actions."¹

¹ NUREG-0371, "Task Action Plans for Generic Activities (Category A)," U.S. Nuclear Regulatory Commission, November 1978.
