

Appendices

This section contains the appendices relevant to NUREG-0933.

Appendix A of NUREG-0933 is an excerpt from Appendix VI, Section 2 of WASH-1400 (NUREG-75/104), "Reactor Safety Study: An Assessment of Accident Risks in U.S. Commercial Nuclear Power Plants," dated October 1975.

Appendix B of NUREG-0933 contains a list of those generic safety issues (GSIs) that are applicable to operating and future reactor plants, including issues that have been resolved with requirements and issues that are in progress for resolution

Appendix C of NUREG-0933 is Priority Ranking Numerical Thresholds Used in Prioritizations Completed Before June 30, 1993. The appendix is maintained primarily for historical purposes.

Appendix D of NUREG-0933 documents those activities related to generic issues, i.e., related generic activities (RGA) that did not meet the criteria for designation as generic issues (GI) but were important enough to require the development of Action Plans by the Office of Nuclear Reactor Regulation (NRR) to address the concerns. The appendix is maintained primarily for historical purposes.

Appendix E of NUREG-0933 documents those generic communication and compliance activities (GCCA) completed by NRR that did not meet the criteria for designation as generic issues (GI), but were important enough to require the issuance of Information Notices (IN) and/or Generic Letters (GL) to licensees. The plan for documenting closed GCCAs was delineated in SECY-96-107. The appendix is maintained primarily for historical purposes.

Appendix F of NUREG-0933 documents those non-reactor GSIs identified, prioritized, and resolved by NMSS. As stated in SECY-98-001, the prioritization procedure for these issues is contained in NMSS Policy and Procedures Letter 1-57, "NMSS Generic Issues Program." The appendix is maintained primarily for historical purposes.

Appendix G of NUREG-0933 documents the Generic Issues Program Current and Historical Procedures
